

Postponement Notice

2023 5th International Conference on Blockchain Technology (ICBCT)

Dear Participants,

We hope this email finds you well. We are writing to inform you about a change in the schedule for the 2023 5th International Conference on Blockchain Technology (ICBCT). The conference, which was initially planned to take place from August 18th - 20th, 2023 in Guilin, China, has been postponed to **November 10th-12th, 2023.**

The decision to postpone the conference was made after careful consideration of various factors. One of the main reasons for this rescheduling is the lower-than-expected number of on-site registrations received thus far. We believe that by extending the conference dates, we will be able to attract a larger and more diverse audience, fostering a dynamic exchange of knowledge and ideas within the blockchain community.

The new dates provide ample time for you to adjust your schedule accordingly. We apologize for any inconvenience this change may cause and assure you that all efforts will be made to make the conference a resounding success.

We kindly request you to update your calendars and make the necessary adjustments to your travel plans. Rest assured that the conference venue, Guilin, China, remains the same. We highly value your participation and eagerly anticipate your presence at the rescheduled event.

Further information regarding the updated conference schedule, program, and registration process will be made available on the official conference website in the coming weeks. We encourage you to regularly check the website for updates.

Should you have any questions or concerns, please do not hesitate to contact our conference secretariat at icbct@academic.net. Our dedicated team will be happy to assist you in any way possible.

Once again, we apologize for any inconvenience caused by this change and thank you for your understanding and continued support. We look forward to welcoming you to the 2023 5th International Conference on Blockchain Technology (ICBCT) in November.
